EXPERTISE

- Experience working with front-end and backend frameworks and libraries such as React, Next, Nest, express and the ability to write clean, efficient code using these tools.
- Experience optimizing websites for performance, including techniques such as lazy loading, minification, and bundling.
- Understanding of responsive web design principles and the ability to create mobile-friendly layouts and interfaces.
- Familiarity with browser compatibility issues and the ability to write code that works across multiple browsers and devices.
- Knowledge of user experience (UX) design principles and the ability to work collaboratively with designers to create intuitive, visually appealing interfaces.
- Strong problem-solving and troubleshooting skills, including the ability to identify and resolve bugs and performance issues.
- Excellent communication and collaboration skills, including the ability to work closely with designers, back-end developers, and other stakeholders to deliver high-quality projects on time and on budget.

OBJECTIVE

Highly motivated individual with experience in developing and implementing software solutions. Proven expertise in developing, testing, and debugging high-performing software solutions with a keen eye for detail. I am skilled in object-oriented programming, web development, and database technologies. Excellent problem-solving and communication skills demonstrate a passion for learning and implementing new technologies.

WORK EXPERIENCE

Frontend Engineer

SokoSQ   Nov 2022 - still date

- Collaborate with the design team to create visually appealing, responsive, and user-friendly interfaces.
- Develop reusable and modular components and implement them using React, Typescript, and other modern web technologies.
- Write clean, maintainable, and testable code, and participate in code reviews to ensure high code quality and consistency.
- Optimize web applications for performance, accessibility, and SEO, and conduct A/B tests to improve user engagement and conversion rates.
- Integrate third-party APIs and services, and implement client-side validation and error handling.
- Work closely with backend developers to define and consume RESTful APIs, and ensure seamless integration between the frontend and backend systems.
- Mentor and provide technical guidance to junior developers, and contribute to the improvement of the development process and tools.

Full-Stack Javascript Developer

Invoke Creation   Nov 2021 - Dec 2022

- Lead a team of developers in the development of web applications using React, TypeScript, and Nest.js.
- Collaborate with product managers to define project scope, requirements, and timelines, and communicate progress and challenges to stakeholders.
- Design and architect scalable, maintainable, and secure web applications, and ensure compliance with industry best practices and standards.
- Build reusable and modular UI components using React and Tailwindcss, and ensure that the UI meets the design specifications and accessibility standards.
- Mentor and provide technical guidance to junior developers, and foster a culture of learning and growth within the team.
- Contribute to the improvement of the development process and tools, and stay up-to-date with the latest web development technologies and trends.
- Write clean, maintainable, and testable code, and lead code reviews to ensure high code quality and consistency.

- **Javascript**
- **Typescript**
- **React**
- **React**
- **Next**
- **React-Native**
- **Tailwindcss**
- **CSS-in-JS**
- **Nodejs**

- **Mongodb**
- **Postgress**
- **Mocha**

EDUCATION

Highest Degree: HND

Yaba College of Technology

2016-2022

Electrical & Electronic Engineeering

INTERESTS

- Fashion
- Business
- History
- Tourism

Frontend Developer

Oneworq   June 2021 - Nov 2022

- Collaborate with senior developers and designers to build and maintain responsive and user-friendly web applications using Vue.js.
- integrate third-party APIs and libraries into the frontend code, and ensure proper error handling and data validation.
- Conduct testing and debugging to identify and resolve issues in the frontend code, and ensure that the applications are compatible with different browsers and devices.
- Write clean, well-structured, and maintainable code, and participate in code reviews to improve coding skills and ensure high code quality.
- Seek guidance and mentorship from senior developers, and contribute to the improvement of the development process and tools.

Software Developer

Ritemate Technology   Dec 2020 - June 2021

- involved and participate in the overall application lifecycle.
- Provide training, help, and support to other team members as well as the client.
- Test software to ensure responsiveness and efficiency.
- Provide training, help, and support to other team members as well as the client.

ACHIEVEMENTS

- Certification of completion of Google Africa Scholarship Training 2020
- Freecodecamp Javascript algorithm and data structure certification
- Freecodecamp front-end libraries and framework certification
